

1. Alpha Kappa Psi has continuously shown me the ways in which their brotherhood can allow me to progress as a professional figure. Within the next few years, I am hoping to find different internships within the greater Boston and New York area. After the networking events, I was able to talk to brothers that had been in my position. Even as a potential new member, the brothers were quick to provide me with advice from their own internship experience. The ultimate end goal is to have a job that allows me to express my creative side and also my love for numbers and community. I am extremely interested in marketing and company branding as the reputation and experience a brand creates is crucial for returning consumers. Alpha Kappa Psi's vast array of alumni offers a vast network of connections that may be pivotal in my journey to reach my goals. As I am from a business focused school, making connections with peers with different interests and majors is extremely difficult. However, through Alpha Kappa Psi, I am automatically connected to brothers from schools all around that may be able to help me in areas to which I lack.
2. If I were to become a brother, I am fully prepared to learn from those above me and pass the knowledge to those around me. For the past four years, I majored in commercial art and graphic design at a technical high school. I have used Adobe Photoshop, Adobe Illustrator, and Adobe InDesign for several projects which have been featured in art galleries and black tie weddings. My skills could be useful for several instances whether it be t-shirt designing to even invitations. Everything aside, I am ready to be a part of the Alpha Kappa Psi community. I am anticipating the unconditional support that I will give and receive to the community of brothers that hold the same values as I do.
3. I am unique in that I believe I am universal. I try my best to make people feel comfortable around me and especially in asking me for help. I thrive off of being a dependable person because dependable people allow for the community to feel more like a family that is always there for each other. I have been there last minute helping a friend design their power point slides to reading a forty page paper on existentialism. I have the creative outlook as I understand the design process and how one would go about even finding a name for their brand. I also have a deep love for statistics and I love engaging on conversations about research studies. I set myself apart from the rest, by confidently standing proud of being a first generation college student that can say I am ready to devote a large fraction of my time to being a part of a brotherhood where we can grow as a community as people and professionally.
