

1. What are your short term and long term professional goals?

In the short term I want to figure out what I want to concentrate in. As of now, I'm just trying out classes, attending events, and looking to apply for summer internships so I can find out which concentration is best for me. As for my long term professional goals, I've always been interested in self-development, and I would like to work for coaches like Tai Lopez, or perhaps start my own self-development company.

2. Based on what you know so far, how do you think Alpha Kappa Psi can help you in your professional endeavors?

Coming to Babson, I felt that I was a step behind most students when it came to professionalism. I realized that skills like writing a resume, networking, applying for internships, and preparing for interview were so important, yet in the past I had little to no experience doing any. Alpha Kappa Psi can help me learn these skills and cultivate my professional side.

3. If you were a brother of Alpha Kappa Psi, how would you contribute professionally to the brotherhood?

I've taken an online course on social media marketing, and my current FME business is a social media marketing agency. Many brothers have their own businesses or want to start their own businesses, and understanding social media marketing can be a large factor in growing their business, and I'd be happy to share my knowledge on that matter. Also, I'm huge on self development, so once I learn the various professional skills I stated above, I'd love to mentor future brothers that are perhaps in the same shoes as me right now.
