

1. What are your short term and long term professional goals? **(75 words max)**

My short term professional goal would be to have an internship in a strategic consulting company before my junior year, preferably in the field of technology or biotechnology. There are many unknowns in my career as my professional interests dramatically changed after attending Babson. Having an internship would give me a deeper insight into these fields. My long term professional goal would be to start my own company at some point in my life.

2. Based on what you know so far, how do you think Alpha Kappa Psi can help you in your professional endeavors? **(75 words max)**

AKPsi is known to be the largest and oldest professional business fraternity, which can then provide me with a community that holds plenty of opportunities for networking within the brotherhood. What is special about AKPsi is the diversity in the professional fields within the Babson community. This trait would expose me to a larger range of fields and provide me with helpful advice on almost any area that I could potentially become interested in.

3. If you were a brother of Alpha Kappa Psi, how would you contribute professionally to the brotherhood? **(150 words max)**

Being part of the AKPsi community would allow me to generously share my experiences with other brothers, whether about a job interview or an internship. I have had internship experiences at a big media company, a nail-polish startup, and a VC company in Shanghai. So the variety of experiences I have had gives me a comparable point of view on the different fields that I have interned in. Also, with my international background, I can share my opinions on the Chinese market if any other brother is interested in working there. However, I can also offer the brothers a deeper insight on the corporate social dynamics in China and what the process usually is when business is being done. These are things that cannot be learned from a textbook or online but through personal experiences.
