Alpha Kappa Psi Application

1. My short term professional goal is to find an internship this summer with a law firm in New York so I can continue to pursue my passion and expand my network in the field. I believe getting an internship with a reputable law firm will give me the work experience and credibility I need for the future. My long term professional goal is to start a nonprofit that would help alleviate caste discrimination in India.
2. I would leverage AKPsi's impressive alumni network to find a law internship and create a network of well-respected lawyers. In addition, I would gain valuable advice from the many AKPsi members who are involved in social ventures and nonprofits. I understand that there are many complexities involved in starting a nonprofit, and I would love for AKPsi brothers to mentor me through the process.
3. I will be a part of the greater AKPsi network and foster relationships between the network of individuals I have accumulated over the years and my fellow brothers. I interned at a reputable law firm in Texas and a small point of sales business in New Jersey. I have good standings with the CEOs of both businesses who always ask me to recommend part time interns. In addition, I have taken both public speaking and resume workshop classes, and I could use my experience to help brothers with their professionalism. Finally, I believe that having a strong support system is essential for both personal and professional growth. I would want be a source of support and help other brothers to achieve their goals.
