

Tianfang (Mike) Chen

tchen2@babson.edu

Class of 2021

1. My short term professional goal is to gain the basic knowledge about how to start and run a business, learn as much as I can from classes and people around me, and find an internship at a technology company.

My long term professional goal is to start two technology companies of my own. One will be focusing on interactive hologram. The other one will be focusing on protective gear for people with meniscus tear.

2. AKPsi is full of brothers with different backgrounds and interests. I will be able to learn professional knowledge from different fields – law, finance, entrepreneurship, etc. from the brothers. Many brothers in AKPsi have already started their own businesses. I'd love to listen to them and learn from their experiences. And of all the friends and connections I make through AKPsi, I might find likeminded entrepreneurs to start and run my business.

3. I'm from China, and I've gained some knowledge of the Chinese market over my gap semester. If I were a brother of AKPsi, I would share my knowledge and further explore about the Chinese market with any brothers interested. I was very involved in my high school's music program, and I have many great friends who are currently pursuing an education in music. If I were a brother of AKPsi, I would be willing to share this connection with any brothers interested in the music field. I'm good at math. If there's any tricky math involved in any brothers' business or homework, I would be more than willing to help. If there's anything I can be of help, logistics wise, networking wise, etc., I would do my very best to help the brothers.
