Alpha Kappa Psi Professional Application

1. What are your short term and long term professional goals? (75 words max)

In the upcoming months, my goal is to find a position I would want to intern in the fashion and marketing industry. My long-term goal is to have worked at different business environments at diverse development stages so that the learning experience obtained will come together and serve as a foundation of running my own business, and implement my ideas and aspirations of both business and social values to come to fruition.

2. Based on what you know so far, how do you think Alpha Kappa Psi can help you in your professional endeavors? (75 words max)

I have a general sense of direction for my career path but I lack guidance, and talking to brothers during rush events has already given me great clarification with their own experience and knowledge. It gives me confidence from this short but valuable interaction, that forming a bond of brotherhood and unity with brothers with such diverse cultural and academic background, that they would aid me with their different viewpoints and proficiencies.

3. If you were a brother of Alpha Kappa Psi, how would you contribute professionally to the brotherhood? (150 words max)

I believe in the idea of how effort equals outcome. I plan to share my knowledge and education through either casual interactions or even being a mentor in the future, such as in the fashion/retail, and marketing industry I acquired from prior internships, as well as my interest in partaking graphic design projects. I'm also a big believer in the notion that you

learn from the person as much as you teach them. I recognized through conversing with brothers that some have similar interests and endeavors as me, and I trust I would add onto that knowledge and create synergy as more perspectives can generate better outcome.

Coming from a country that is not prevalent in the community of Babson and AKPsi, I believe I can bring a different element to the table; not to reject the established values of the organization but to add more value to it.
