

## **Alpha Kappa Psi Rush Spring 2019 Application**

1. Out of all the suits, I believe hearts *suits* me best, not because of love or passion but because I believe it's important to make decisions that appease the heart rather than the mind. This was incredibly important to me when I decided to come to a business school where there's often pressure to pick the profession with the biggest price tag rather than something that makes you happy. If you choose your profession based off what appeases your mind rather than what you're passionate about, then next thing you know, you'll be stuck at a miserable job, even if it pays well. What's working hard worth if what you're doing is only filling your pockets and not your heart?

2. If there were a way to wrap up what I bring to the table in any scenario, it would be creativity and ambition. If I was a brother, I would most prominently professionally contribute my ambition to go beyond the status quo whenever there is something to accomplish. I'm a creative, artistic person and I truly believe in taking problems and finding creative solutions to solving them. As a result, I've often found myself taking on more tasks than I can manage but at the end of the day, I can't let the quality of even one of my tasks fall below my standard and will do anything to accomplish those goals. Professionally, my creativity and ambition would allow me to seamlessly contribute to the marketing department in Alpha Kappa Psi. I'm incredibly passionate about being able to translate my creativity from my artistic world into the professional marketing world.

3. I believe what makes me unique is how thrilling I find interacting with people from all different backgrounds and venturing out into different areas in and outside of business. I despise having to conform to just one mold of what I should do and am passionate about experiencing a little of everything that the world and specifically Babson has to offer. I'm a passionate artist; drawing, painting, graphic design just to name a few and also find joy in learning new languages. But truly, I hope to be extended a bid to be able to bring my experiences and skills to the table to those I know can bring theirs to mine to help me grow as well. I like working and interacting with people whose presence I know can make me a better person not just professionally, but socially too and I've met lots of brothers who I think fit that character really well. If there's anything I really want to get out of my college experience that I believe Alpha Kappa Psi can help me attain is developing an inspiring community, finding ways to be creative in business, and giving me experiences that allow me grow as a professional and human being.
