

1. What are your short term and long term professional goals?

My short term professional goals are to explore each area of business and find my passion. Currently, I feel as though I enjoy consulting and would like to concentrate in strategic management. I could see myself working as a consultant because it gives me a chance to see different industries and company cultures due to its nature of frequently changing projects. My long-term plan is to eventually use the skills I have learned about management through consulting and apply it to the fashion industry.

2. Based on what you know so far, how do you think Alpha Kappa Psi can help you in your professional endeavors?

Alpha Kappa Psi will help me develop as a businesswoman by teaching me valuable skills that I can not learn in the classroom such as networking, job seeking, and brotherhood. It will help me get exposure to people from all different concentrations so that I can have a more holistic understanding of business. I admire the genuine personalities of the brothers and believe that each one has something I can learn from to develop professionally and as a person. Alpha Kappa Psi would also allow me to branch out and connect with a larger group of people at Babson and beyond.

3. If you were a brother of Alpha Kappa Psi, how would you contribute professionally to the brotherhood?

I would contribute to the brotherhood by bringing a good attitude and passion for learning and the business world. I would also be involved in all of the activities that would take place involving brotherhood and professional development. Once I am an upperclassman I will try my best to give back to underclassmen by always being available to help them. I would also have much more experience professionally at Babson to allow me to mentor any future brothers. Currently, as a freshman, I would be open to providing brothers access to the professional network I have.
