

Alpha Kappa Psi Professional Application

Questions

1. What are your short term and long term professional goals? **(75 words max)**

My short term professional goals are centered around learning how to better market myself within the tech industry. This includes developing the proper vocabulary, interview skills and resume to open doors to large tech company internships within the next two years. Long term, I hope to work in marketing or product management within a large, cutting edge tech enterprise upon graduation, and someday contribute with more impact as a top industry leader.

2. Based on what you know so far, how do you think Alpha Kappa Psi can help you in your professional endeavors? **(75 words max)**

Based on what I've seen thus far, the biggest impact AKPsi can have on me is by allowing me to connect with the incredibly diverse network of brothers. Through the conversations I've had, I can already tell that the brothers have unique experiences and insight both within my possible concentration and future industry, and could help serve as mentors as I develop my skills, refine my goals and seek out new professional opportunities.

3. If you were a brother of Alpha Kappa Psi, how would you contribute professionally to the brotherhood? **(150 words max)**

As a brother of AKPsi, I believe I'd be able to contribute significantly using my prior leadership training experience as well as my own personal network of young business professionals through DECA (a high school business organization). Having served as Nevada DECA State President, I've had the privilege of attending 10 specialized business leadership trainings, in which I learned presentation, workshop and speech skills that I continue to build upon today. As a brother, I would be able to share and improve these tactics with others.

These conferences, as well as my own personal work experience, have also left me with a fairly sizable professional network across the country that I would be more than happy to share with my brothers in any way they may find useful. These former coworkers and close friends include Google and Palantir employees, MIT and Harvard students and CEOs of small startups.
