Alpha Kappa Psi Professional Application

1. <mark>What are your short term and long term professional goals?</mark>

    My short term goals include finding an internship relating to technology or business analytics over the summer. My long term professional goal is to make a difference in the world and be the change I want to be. By combining technology, analysis and business, such as working for Alibaba, I will be able to use analytics to contribute to the entrepreneurship culture and local businesses around Asia.

2. <mark>Based on what you know so far, how do you think Alpha Kappa Psi can help you in your professional endeavors?</mark> **(75 words max)**

    From the special bond between big and little, the community service event of giving back to local farmers, to the variety of professional interests of the brothers, Alpha Kappa Psi already gave me fresh perspectives and different professional insights of business throughout the events. The broad network of brothers will also open up new opportunities for me to pursue regardless of my country of residents.

3. <mark>If you were a brother of Alpha Kappa Psi, how would you contribute professionally to the brotherhood?</mark> **(150 words max)**

    I was part of the robotics program ever since my middle school days and I worked my way up from one of the members to the team co-captain. I learned a wide variety of hard skills, such as Computer aided design, 3D printing, programming, and softer skills like public relations and team management. If I were a brother of Alpha Kappa Psi, I can share my knowledge on technology to further people's insight on business, management and entrepreneurship. Furthermore, as a third culture kid who grew up in one culture while learning about another, my perspective to life is different compared to people raised within one culture. Being multicultural and multilingual will broaden my business connections in both English-speaking and Chinese-speaking networks, something I aim to bring to the brotherhood.

Optional Submission

If you have any personal work (i.e. poem, art piece, programming scripts, etc.) that will help us understand your professional capabilities even further, feel free to include that with your application as well.
